

Microgrids: An alternative fuel resilience

Eric Dupont
PowerSecure, Chief Development Officer

1

**PowerSecure
Founded in 2000**

2

PowerSecure is a technology company focused on creating **efficient, resilient, reliable, clean and sustainable supply of power** by managing consumption through energy efficiency and on-site power through distributed energy systems and the integration of multiple energy resources for basic and advanced microgrid deployments.

3

In 2016 PowerSecure **joined the Southern Company** as a wholly owned subsidiary.

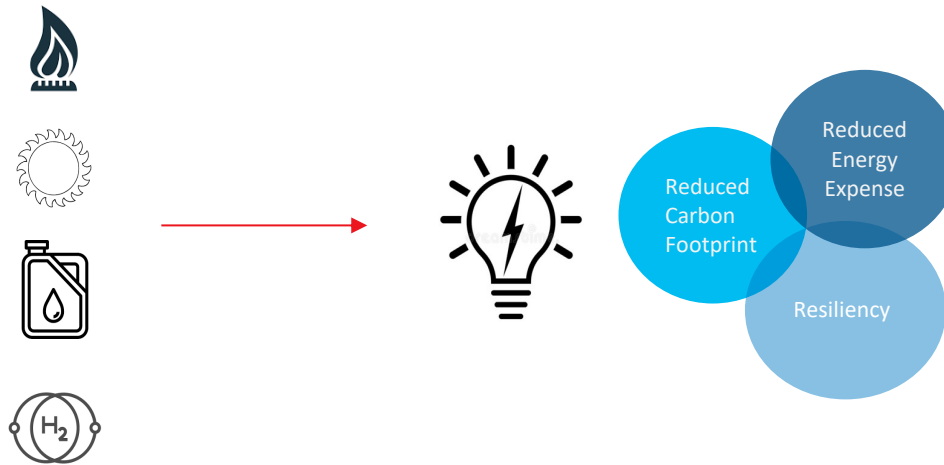

4

THE leading microgrid provider over the last 20+ years, PowerSecure has installed over 2,400 microgrid systems (2+GW) and monitors, manages and dispatches over 1.8GW of microgrid capacity across the US.

We are a proven provider of multi-measure **energy efficiency** projects with \$800+ million engineered, installed and commissioned projects while reducing over 233,072 MWh of annual energy consumption.

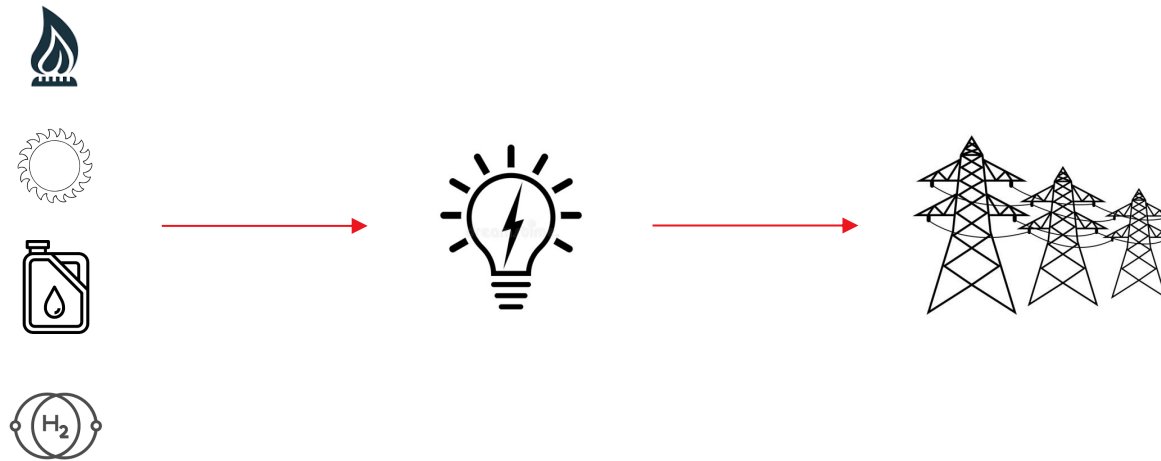

The world's relationship with energy is changing rapidly. Our role is to provide dependable solutions to eliminate the risk in this evolution.

Consumers of electric energy are beginning to own converting other forms of energy into electric energy whereas they have traditionally only purchased electric energy.

The world's relationship with energy is changing rapidly. Our role is to provide dependable solutions to eliminate the risk in this evolution.

To offset expense and risk of converting other forms of energy to electric energy, consumers desire to monetize the use of excess electric energy back to the utility grid.

Microgrid+ - Design and deliver expandable microgrids to enable long-term success in achieving energy goals
